PROJECTS

NoDueX - (On Going):

Digital No-Due Clearance System as a **full-stack web application** to automate the student clearance process required for exam hall ticket approval, eliminating manual paperwork through a secure and structured online workflow. The system allows students to **submit no-due requests, enables department staff to verify and approve clearances department-wise**, and provides real-time status tracking. The application is built using a **React.js frontend with a PostgreSQL database** for reliable data storage, along with backend services for handling authentication, approvals, and data flow, demonstrating practical experience in full-stack development, database design, and real-world workflow automation.

EmoVision - (A Emotion recognizer) :

EmoVision is a Python-based project that detects human emotions from facial expressions using images or real-time video. It classifies emotions using deep learning techniques and **plots graphs to visualize emotion distribution over time**. The system is developed using **Python with OpenCV and TensorFlow**, integrated with **Django** for the web application, and uses **MongoDB** for data storage

Snake And Ladder Game - Using Python :

Developed a basic **Snake and Ladder game using Python** that simulates dice rolls and player movement on the board. Implemented game logic for snakes and ladders to move players up or down accordingly. Used conditional statements and loops to control turns and game flow. Applied functions to organize code and improve readability. The project strengthened understanding of core Python programming concepts and logic building.

AutoParts Hub - (MERN Full-Stack Application):

Developed a full-stack web application using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** that allows users to search and purchase **used automobile spare parts**. **Postman** is used to test and validate REST APIs, while **MongoDB** manages parts inventory, seller details, and availability, enabling fast and reliable access to affordable auto parts.
